Teaching Strategy

Students

Seeking in-depth knowledge and compact teaching

Teaching Areas

Entrepreneurial decisions and fundamental concepts in Logistics, Operations and Supply Chain Management

Planning of network, location, site, and layout

Demand and resource management

ERP and **SCM** software systems, Industrial management methods

Teaching process

Global thinking and acting through:

- methods and tools, well established in companies with international activities
- globally standardized terminology

Orientation towards practice through:

- large case studies directly from companies
- several events together with professionals
- master thesis performed in companies in Switzerland and abroad

Use of interactive teaching methods:

- several "serious games"
- numerous interactive teaching elements (Flash)
- students present and discuss their case studies coached by assistants

Goal

Acquire knowhow on

- strategic
- tactical
- operational level

Develop professional and social competencies:

- to organize and lead operational business processes
- for planning and control of value-adding systems

Result

Become fully equipped for the employment market under attractive conditions

First jobs as:

- project leaders
- staff of board members
- partners of startup businesses

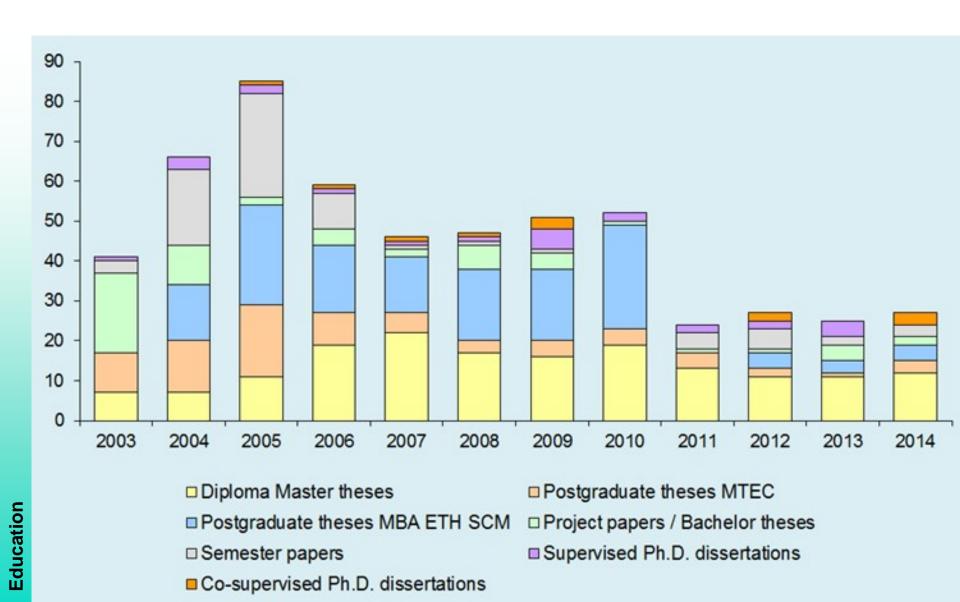

In industry and service industry

Within an international and intercontinental environment
